

Second Evening Edition.

FOR STEAMBOATS, RAILROADS, &c.

FRIDAY AFTERNOON, 3 O'CLOCK.

Owing to an accident in our machinery yesterday, we were obliged to send our Morning Edition to our Evening Edition subscribers.

STATE OF THE MARKETS TO-DAY.

FRIDAY, June 16—2 P. M.

ASSETS.—The market is steady for Pots at \$5.75 to \$5.81, and Plates \$5.50.

COTTON continues firm at the late advance.

FLOUR and MEAL.—Our market for Western and State Flour continues to favor the buyer, especially the low grades, much of which is of doubtful character, and far below the standard adopted last autumn.

The plan of combination: Each property-holder gives his assent in writing to be taxed on the same amount of property on which he is assessed for City or County expenses, for the prosecution of such illegal traffic. Such written assents are recorded in a book, kept for the purpose, which form the assessment roll for the suppression of liquor shops. It is believed that in this City fifty cents on the thousand dollars of Temperance capital, is sufficient to accomplish the purpose, as it has been found to be in other parts of the State—and, therefore, the Committee have fixed upon that sum to begin with. And as there are persons who may prefer to pay directly into the treasury, and who are interested and desirous to suppress this terrible trade, they also are privileged to contribute by direct contributions.

When a sufficient amount in the opinion of the Carson League Committee is paid into the Treasury, to authorize the commencement of operations, the Committee will employ a competent number of faithful and brave men, whose business shall be to pick up the illegal sellers in the different Wards of the City, and the witnesses to convict them, and report them to the prosecuting officers for prosecution; and in case such prosecuting officers neglect their duty in this respect, the Agent of the League will see to their indictment, trial, conviction and punishment, as well as they may, in the criminal tribunals of the State, according to the law of the land.

It often happens that the Excise Boards, in violation of their obligations and oaths, license houses to sell which they have no authority to do under the statute, the Agents of the League will also ascertain such cases, and prosecute the sellers under such valid Licenses and inflict and punish in the Courts the dire penalties of the Boards of Excise who have failed given color of law to their crimes.

The League also opens an office where its books are kept, with a correct account of the sums paid in their disbursement, by whom and to what person and purpose; which are also open to the inspection of all persons who have contributed to its funds—and where all suffers, wives, daughters, sons or other relatives or friends of humanity may resort and make complaints against the authors of their sufferings in this regard, and be sure to find sympathy and relief under the law.

Experience has taught us that such suffering is the best of reasons, who have not noticed the most distressing feature of the case. We refer to the rapidity with which the number of entirely uneducated frenzied in Georgia increases. It increases more rapidly than the entire population does. By reference to the last census, it will be seen that between 1840 and 1850 the rate of increase of the entire white population was a little under 25 per cent. During the same time the rate of increase of the colored population of the State is said to have been 40 per cent. It is only by distinctly observing this rapid increase that we can see the facts in their appalling magnitude. This vast army of forty-one thousand will be more than doubled in thirty years. At the rate of the increase shown by the census, it will have within its ranks in the year 1890, one hundred and seventy thousand of the citizens of Georgia.

This number equals the entire adult population of the State as it stood seven years ago, and the number in the Legislature is now swollen to 41,000! Many have lost their manly and patriotic qualities, and without the best of reasons, who have not noticed the most distressing feature of the case. We refer to the rapidity with which ignorance increases among the slaves.

The fact that ignorance increases among the Whites of the South is commented on with earnest and natural eloquence by the leading journals of that State. The *Augusta Chronicle*, and *Sentinel* terms it "a foul blot," well calculated to suffice the cheek of every patriot and philanthropist with shame." &c.

The Federal Union says:

"A generous patriots is startled by the fact as it stood in 1840. Upward of 30,000 free white grown-up citizens in Georgia had to read or write a word of their mother tongue." This number equals the entire adult population of the State as it stood seven years ago, and the number in the Legislature is now swollen to 41,000!
